Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. **Claims 1 and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goodman et al (US 6454865).**

Goodman et al disclose a deposition chamber and a rotatable (Col 3 lines 13-17) susceptor with a recess to hold a substrate and gas inlets into the recess and out lets from the recess- there are three channels and any of them could be used as supply channel or as discharge channel from the recess (Fig 35). Further, the gas inlet/outlet is connected to an arm, which sits under a groove at the rear of susceptor (See Fig 16 and Col 25 lines 9-42).

Regarding the limitation of the groove having curved shape the groove to hold the arms could be several curved shapes as disclosed in Fig 8, Fig 21-62, Fig 22 and Fig 32.

Regarding the addition of a limitation of notch Goodman et al disclose grooves or notches on the side (Fig 16-62) and where the inlets and outlets also join.

Regarding a shape adapted to supply or discharge gas, the inlets and outlets have shape to enable flow of gas.

Regarding the limitation that the gas inlet notches are located diametrically opposite, it is seen that in Goodman et al they are located opposite to each other as they are situated at 120

degrees. Further there is no requirement that there should be only three inlet/outlets, so that for four inlets/outlets obviously they will be even more in opposition.

Response to Arguments

Applicant's arguments filed 3/5/2008 have been fully considered but they are not persuasive.

Applicant's argument according to new limitation is addressed above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
